Class Size 2009-2010

Introduction

Class size reduction for the early elementary grades remained a state goal in 2009-2010, continuing efforts initiated by the Iowa Early Intervention Block Grant Program (House File 743) in 1999. Iowa's class size reduction goal established in Iowa Code Chapter 256D is 17 students per classroom for basic skills instruction.

Note: *The FY 2004 appropriation was reduced as a result of an across-the-board cut after the initial appropriation and then received a partial restoration of funds.

Methodology

Public school districts report the number of kindergarten, first, second, and third grade classroom sections, students, teachers, and aides by building during the Fall Basic Educational Data Survey (BEDS). Special education teachers and aides are not included in the reporting. Physical education, art, music, and other "specialty" and "pull-out" program (such as Title I reading and math) teachers are also excluded from the teacher count.

Some districts utilize multi-age classrooms for their K-3 students. For example, a classroom may combine first and second grade students in one room. Districts may report these combination classrooms as grade level "Other" on the Class Size submission, but these classrooms are not included in this report. The Department of Education calculated average class size for kindergarten through third grade at the district and state level. Average class size equals the number of students divided by the number of classrooms for each grade level.

$$\text{Average Class Size} = \text{Number of Students} / \text{Number of Classrooms}$$

Since average class size uses the number of classrooms as the denominator, adding additional teachers to a classroom does not lower the average class size for that grade level. The use of classroom aides also does not reduce average class size at the district or state level.

¹ Beginning in FY2010, funding of Iowa Early Intervention Block Grant Program was rolled into the State Aid formula. This allows the funding of this program to grow along with the overall funding of school districts across Iowa.

Findings

This report provides class size data from 1998-1999 to 2009-2010 for kindergarten through third grade. Average class size increased in 2009-2010 for all grade levels when compared to 2008-2009 (see Table 2 and Figure 1). All averages were at the highest level since 1998-1999. Despite the increases, average class size remained below 20 students for kindergarten and first grade in 2009-2010. Third grade continued to show the highest average class size per classroom of the grades examined, at 21.1 students per classroom for 2009-2010, and remained above 20 students in each year studied.

Overall the increase in average class size in 2009-2010 continued the trend in recent years. However, first through third grades remain below the 1998-1999 levels. Average class size declined for kindergarten through second grade from 1998-1999 through 2001-2002 but increased in each of the subsequent years through 2005-2006. In 2006-2007, kindergarten average class size declined slightly. In 2007-2008, kindergarten was the only grade to increase average class size from 2006-2007. In 2009-2010, all grades increased slightly from 2008-2009. Third grade showed a decline from 1998-1999 through 2002-2003 but experienced alternating increases and decreases throughout 2005-2006. Third grade remained steady in 2007-2008 when compared to 2006-2007, and increased slightly in each subsequent year. First and second grade show steady increases from 2002-2003 through 2006-2007. Both grades decreased slightly in 2007-2008. Second grade remained steady in 2008-2009 while both grades increased in 2009-2010.

Smaller districts were more likely to meet the state goal of 17.0 students per classroom than larger districts in 2009-2010. The average class size for all grades was below 17.0 students per classroom for the <300 enrollment category in 2009-2010. The larger districts were more likely to show the highest average class sizes in 2009-2010. The 2,500-7,499 and 7,500+ enrollment categories experienced average class sizes of 21 or more for all grades in 2009-2010. The average class size for these enrollment categories remained above 20 students per classroom for the past eight years.

The percentage of classrooms above the state goal of 17 students per classroom increased in 2009-2010 from the previous year. The greatest increase was in the kindergarten classrooms where the percent of classrooms above 17 students went from 73.6 percent in 2008-2009 to 78.0 percent in 2009-2010.

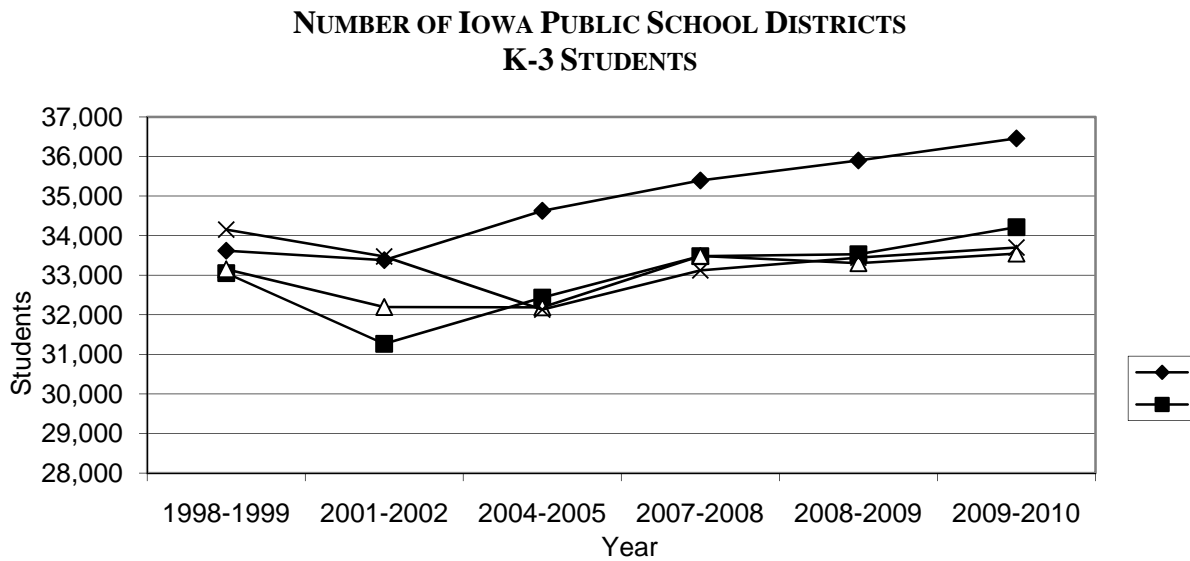

This is the first year in several years there has been an increase from the 1998-1999 levels. Even though this is the first year for an increase from the 1998-1999 levels, the ratio of students per classroom, in general, is lower than the 1998-1999 levels.

The growth in the number of teachers has outpaced the growth in the number of students for each grade level from 1998-1999 to 2009-2010 (see Figures 2-4). For example, the number of first grade students increased 3.5 percent since 1998-1999 but the number of first grade teachers increased 6.7 percent during the same period. The number of classrooms outpaced the growth in the number of students for first through third grade. Kindergarten showed an increase in students of 8.4 percent while the increase in the number of classrooms was 8.1 percent since 1998-1999.

Declines in average class size from 1998-1999 to 2009-2010 outpaced the declines in enrollment during the same period for first grade (see Tables 9 and 10). During this period, average class size declined 2.8 percent for third grade while enrollment reached 4.2 percent. Kindergarten class size increased by only 0.5 percent while the enrollment increased by 8.9 percent when compared to 1998-1999.

Expenditures

District expenditures decreased in FY 2009 to \$29,817,727.68 with salaries consuming the largest percentage of the total. Purchased Services, Supplies and the Other categories were below 1.0 percent each (see Table 11 and Figure 5).

In FY 2009 the largest districts (+7,500) spent the smallest percentage of early intervention funds on staff salaries at 75.9 percent. Small districts in the <300-599 and 600-999 enrollment categories spent the highest percentage of funds on staff salaries, above 80 percent, yet paid fewer benefits than the larger districts. The very smallest districts utilized supplies the most in FY 2009 at nearly 1 percent. Overall, the percentage difference of categorical expenditures fluctuated very little based on the size of a district.
