

The Madrid Community School District, in working with the Boone County Health Director's recommendation, is asking for the ability to provide continuous remote learning from October 12, 2020 through October 21, 2020 at the Madrid Elementary School. The elementary staff has seen a large number of positive COVID tests. These are the dates of elementary staff tests being taken that are positive. The staff listed are throughout the entire building, and does not indicate an isolated spread in one specific grade level or department.

10/4/2020 - 1 positive test

10/5/2020 - 1 positive test

10/7/2020 - 3 positive tests

10/8/2020 - 1 positive test

10/11/2020 - 2 positive tests

10/13/2020 - 1 positive test

These numbers have caused staffing issues and raise concerns that the spread will continue to additional staff and students without an opportunity to allow students and staff to utilize remote learning and allow the current staff outbreak to subside.
